DETAILED ACTION

Claims 1-40 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-12, 20-24, 32 and 33, drawn to the compounds and compositions of the compounds of formula (1) and formulae (1A) and (1B) where (A¹, A², A³) is (CH₂, NH, CH).

Group II, claim(s) 1, 2, 10-12 and 22-24, drawn to the compounds and compositions of the compounds of formulae (1A) and (1B) where where (A¹, A², A³) is (CH₂, CH(OH), CH).

Group III, claim(s) 1, 2, 10-12 and 22-24, drawn to the compounds and compositions of the compounds of formulae (1A) and (1B) where where (A¹, A², A³) is (NH, CH(OH), CH).

Group IV, claim(s) 1, 2, 10-12 and 22-24, drawn to the compounds and compositions of the compounds of formulae (1A) and (1B) where where (A¹, A², A³) is (CH₂, CH₂, N).

Group V, claim(s) 13-19, 25-31 and 34-40, drawn to complex compositions of the compounds of formula (1), (1A) and (1B).

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I-IV are different significantly in chemical structures. They are consequently separately classified in the U.S. Patent Classification System and require separate searches in the Chemical literature. None of the prior art considers these groups as functional equivalents. Each group can support a patent. One does not require the other for their use. If, say, the 1,4-

benzothiazepine compounds of Group I, were anticipated, applicants would not acquiesce in the objection of any of the Groups II-IV there over or vice-versa and, thus, they are not linked to the same or corresponding special technical features.

Groups I-IV and V are directed to compounds of formulae (1), (1A) and (1B) and complex composition, which includes the compounds of Groups I-IV and an additional active ingredient.

If Group V is elected further restriction may be required.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art, restriction for examination purposes as indicated is proper.

Tentative election of a single species within the elected group is further required.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
